

# REACH DIRECTIVE

The REACH regulation (Registration, Evaluation, Authorisation of Chemicals) is intended to improve protection of man, animals and environment against detrimental chemicals. Everyone bringing more than one ton of a chemical to the European market annually is subject to the REACH regulation.

E-T-A produces exclusively non-chemical products. We are in close contact with our suppliers and can confirm that the few process chemicals required for manufacturing E-T-A products are either not covered by the REACH regulation or have already been registered by the supplier.

As far as we know at present our articles do not currently contain any substances above the allowed limits that are listed on the latest "[candidate list \(https://echa.europa.eu/candidate-list-table\)](https://echa.europa.eu/candidate-list-table)".

E-T-A products are not chemical substances, but articles. Therefore we do not require a registration, evaluation or approval to the REACH Regulation 1907/2006 and neither do we have to establish a safety data sheet to article 31 and ANNEX II and the amended regulation 2015/830.

E-T-A Elektrotechnische  
 Apparate GmbH  
 Industriestraße 2-8  
 D-90518 Altdorf,  
 Gewerbegebiet Nord
