Regulation for chemicals according to RoHS directive 2011/65/EU incl. 2015/863/EU

Dear Sir or Madam,

The restriction of certain hazardous substances according to the RoHS directive 2002/95/EG has become effective at the 1st of July 2006 and applies to the substances lead, cadmium, mercury, hexavalent chromium, PBB's and PBDE's.

This directive was replaced at 1st of January 2013 by the RoHS directive 2011/65/EU.

Z+F declares the conformity of the product ranges **Z+F Ferrules, Z+F Terminals, Z+F Tools, Z+F Machines and Z+F Laser Measurement Systems and Z+F Time Relay** in terms of the above mentioned RoHS directive 2011/65/EU (including the amending directive RL2015/863/EU) and the electronic legislation.

Concerning the WEEE-directives, Z+F does not manufacture any electrical or electronical devices which are for exclusive or sporadic utilization in private households. We oblige ourselves to create a reasonable possibility for returning and disposing devices from other utilizations than private households which were put in circulation after the 13th of August 2005.

With best regards

i.A. Benjamin Mayinger
Sales Manager
