

Guide to Measuring Power Cords & Cord Sets

Interpower® measures its **cord sets** from the face of the connector to the face of the plug, not including the pins. Interpower uses this method for all cord sets.

When using a hooded male plug, the measurement will be from the edge of the hood.

Interpower measures its **power cords** from the face of the connector or plug, not including pins, to the end of the cable. Interpower uses this method for all power cords.
